

Rat Fibronectin

Synonyms:

PLEASE NOTE: ALWAYS CENTRIFUGE VIAL BEFORE OPENING

| Size | Order # | Lot # | Expiry Date |
|--------|--------------|-------|-------------|
| 20 µg | 4065.979.020 | | |
| 100 µg | 4065.979.100 | | |
| 1 mg | 4065.979.199 | | |

Please enquire for bulk quantities and other vial sizes

Description

Plasma fibronectin level is elevated in severe coronary artery disease. Increased plasma fibronectin levels are related with venous thromboembolism (VTE) particularly in males, and extend the probable association between biomarkers and risk factors for arterial atherothrombosis and VTE. Fibronectin plays a role in several cellular processes, including tissue repair, embryogenesis, blood clotting, and cell migration/adhesion. Fibronectin consists in two main forms: 1) as an insoluble glycoprotein dimer that serves as a linker in the etracellular matrix and 2) as a soluble disulphide linked dimer found in the plasma. The plasma form is produced by hepatocytes, and the ECM form is synthesized by fibroblasts, chondrocytes, endothelial cells, macrophages, as well as certain epithelial cells. Fibronectin alos takes part as a general cell adhesion molecule by anchoring cells to collagen or proteoglycan substrates. Fibronectin organizes cellular interaction with the ECM by binding to different components of the extracellular matrix and to membrane-bound Fibronectin receptors on cell surfaces. Molecular Weight 220kDa.

• Source Rat Plasma

Purity ≥ 95 % (SDS-PAGE)
Endotoxin level ≤ 0.1ng/µg (≤ 1EU/µg)

• Buffer The Rat Fibronectin was lyophilized from a concentrated 1mg/ml solution

containing 20mM Tris CI pH-7.5*

Physical state
Sterile filtered, lyophilized

Reconstitution

It is recommended to reconstitute the lyophilized Rat Fibronectin in sterile 18M-cm H2O not less than $100\mu g/ml$, which can then be further diluted to other aqueous solutions.

Stability

Store the lyophilized fibronectin at 4°C. Upon reconstitution fibronectin should be stored at 4°C for 2 weeks and for future use below -18°C. **Please avoid repeated freeze-thaw cycles**.

Usage: For research use only. Not for use in diagnostic or therapeutic procedures. Not for human use.

^{*}The Buffer may vary depending on the Lot #. Please contact our technical support if you have specific requirements.
